As a trial attorney, having an investigator you can trust and rely upon is crucial. I have used Maki Kudaka as an investigator on multiple occasions and each time she has exceeded my expectations. One such example that I think highlights Ms. Kudaka's value and investigative expertise was a case where Ms. Kudaka was put in the difficult position of interviewing two parents regarding their daughter's troubling conduct. The case was time sensitive and of the utmost importance. Ms. Kudaka had to travel a great distance to interview these witnesses and get the job done both quickly and correctly. Ms. Kudaka approached this delicate situation with total professionalism and used her investigative skills to gather all the important information I needed. Thanks to her thorough investigation and ability to gather information from reluctant witnesses, I was able to achieve a successful result for my client in my case.
